On 28th October 2022, it was indeed an honor and privilege to engage with one of the founding members of MOGSC and its first president, Y.M. Tengku Dato’ Ibrahim Petra bin Tengku Indra Petra. The meeting was arranged by MOGSC’s second President, Ts. Sofiyan Yahya.

During our one and a half hour session, it was good to hear Y.M. Tengku’s stories on how MOGSC was created and their struggles initially in gathering industry players under this platform. We also took the opportunity to update him on MOGSC’s key focus areas and our approaches to continue upholding MOGSC’s values created since its initial establishment.

We mentioned to him that next year, MOGSC will be celebrating its 20th anniversary and the current EXCO line-up pledges to continue all the hard work of the founding members in ensuring the industry is well taken care of.

We also give him the honour of launching our newsletter, ENERGISE, and he become the first recipient of our quarterly bulletin.

We are pleased to announce that we have moved the MOGSC Secretariat Office to Binjai 8 Premium SOHO. This is part of our strategic effort on cost savings to our overall overhead.

Our new office address is Unit 22-3A (Level 22), Binjai 8 Premium SOHO, No. 2, Lorong Binjai, 50450 Kuala Lumpur.

Our phone number remains the same: 03-2181-8781 / 8782
We can also be contacted through email at enquiry@mogsc.org

Do drop by and visit us!
Dear Respected MOGSC Members,

To start with, I feel like 2022 came and went by so quickly! Maybe, the slow pace of 2020 and 2021 due to COVID-19 pandemic made 2022 feel super fast, especially when all the restrictions were eased progressively until we eventually got back to our normal lives.

For MOGSC, I felt that 2022 was very different from what we used to be in the previous years. To recap, the noises from the industry grew louder especially in the wake of 2 difficult years of working during the pandemic. Many companies struggled to make ends meet with the increase in costs of doing business, supply chain disruptions, cashflow and resource mobilisation issues.

This year, I think we were more vocal and firm in pushing forward agendas, issues and messages from the industry to the stakeholders, especially in the first half of the year. This resulted in closer ties and collaboration with stakeholders in addressing the industry issues and some improvements can already be seen in a few segments towards the end of the year. In series of engagements with stakeholders, we could see their seriousness and openness to work together with MOGSC to address issues related to the industry and to ensure the current supply chain will be ready for the energy transition agenda.

In my humble opinion, with the new Executive Committee (EXCO) line-up elected into office in June 2022, MOGSC have the strength and enthusiasm to continue pushing these agendas in order to create a sustainable energy ecosystem in Malaysia. However, the EXCOs alone will not be able to do this. I believe we have given our best while also juggling our day job concurrently.

Hence, I urge and encourage all MOGSC members to continue giving your support to any initiatives, programs and events organised by MOGSC. We really look forward for more active participation especially in the working groups that relates to you. The re-energised and revamped working groups is a powerful platform to gather the industry experts, practitioners and stakeholders in achieving MOGSC’s aspirations of creating a conducive business environment.

In the last 6 months, I am happy to see working group meetings attended by many representatives from their respective companies. This is very important as we see working groups is where the pain points, issues, proposed solutions and recommendations can be discussed and brought forward immediately to stakeholders. In fact, some of the working groups had already brought in stakeholders into their meetings so that these matters and improvements can immediately be brought forward for further actions and deliberations.

For 2023, my hope is that we will continue to strive for the betterment of the industry, guided by our 4 Key Focus Areas (Addressing Liquidity in the Market, Fair & Sustainable Contracting Mechanism, Championing Local Industry Participation & International Expansion and Advocacy for Energy Transition & Transformation) with its Strategic Thrusts set earlier. I hope we have shown that we have made some progress in the last 6 months, but I will be the first to admit that we need to do more if we want to solidify MOGSC’s position as the leading association in the Oil, Gas and Energy industry and as the voice of the industry. Our membership now is approaching 600 members but we definitely need more. To do this, you need to believe in us and we must work hard to reciprocate that trust.

I see 2022 as a stepping stone to a better 2023. So let’s work together to continue addressing the industry issues and preparing the industry for a brighter and sustainable future. Insyallah, together we will make our industry great again.

Happy New Year 2023!
Ts. Syed Saggaf Syed Ahmad, MOGSC President
"The industry and MOGSC had seen various challenges throughout its history. I personally feel very grateful to be able to continue to serve in the industry as a patron and for the industry through MOGSC. Through my lenses, MOGSC had been an excellent platform in driving the advocacy of sustainability of solution and service Industry of O&G in Malaysia along with other industry associations. I take pride in the accountability to serve as a member of the leadership team in MOGSC to carry out the mandate in accelerating the rejuvenation of the industry health badly affected by economic shocks and many other challenges. At the same time, my duty is becoming very meaningful and purposeful to influence and contribute towards the ability of OGSE sector to address the global forces and embrace the transformation and transition.

My sincere doa for the OGSE sector to continue to strive and for the players and the talents to have a fulfilling career and journey. Thanks to everyone who worked selflessly in the past and thankful to the current dedicated and passionate EXCO members working closely to bring about the progress of the OGSE sector." - Ts. Anwarudin Saidu Mohamed, Honorary Secretary

"2022 was a great transformational year for MOGSC as the new EXCO line-up immediately hit the ground running and strategized the way forward for a better MOGSC.

My aspiration for 2023 is for MOGSC to successfully address the four (4) key focus areas and provide a framework to measure the progress of our effort. We need to seriously look into the pain points of our industry and roll out strategic plans with our stakeholders, grow our membership base and to constantly engage with our members for a sustainable MOGSC." - Capt. Ahmad Imran Mohd Azmi, EXCO

"I had always been a vocal backbencher in previous MOGSC engagements as a member. There were many industry pain points that as a business owner myself, that hit very close to home. Realising that the only way to effect change was to be part of the solution, I had volunteered to be an ExCo.

2022 in my opinion is a good start to a revolutionary new chapter in MOGSC and how it operates. With the leadership of the new office bearers and fellow ExCo members, I firmly believe in and support the 4 core pillars that we are championing for this term as I believe it resonates to all members and stakeholders that we get this done and we get this right.

Aspiration kamek untuk tahun 2023 tok, is to ensure that MOGSC gik dapat membuktikan relevance and clear objectives that nang mena-mena dapat memartabatkan OGSE companies in Malaysia, and more active participation from our Sarawak and Sabahan players. Let's bring sexy back to this industry." - Fuzz Sufian, ExCo

"I feel honoured to be part of the new EXCO line-up and together as a team we thrive for the betterment of our association. As a 1st time EXCO member, I have definitely gained a lot of experience from the rest of the team and will continue to contribute fresh ideas to the association. I strongly believe the new EXCO line-up will continue to put our efforts together in addressing the four (4) key focus areas and try as much as possible to resolve all the pain points faced by our members and OGSE at large. Continuous engagements with members and various stakeholders to be held more frequently to achieve the aspirations." - Shazli Razak, EXCO
"I hope it is not too late to wish everyone a Happy New Year 2023. The past few months have been a whirlwind for us in many positive ways. With the new EXCO line-up, which was elected in June 2022, we continue to strive for the betterment of the industry. Since the pandemic struck, it has never been easy for all of us in many ways. However, the energy, passions, and commitment exhibited by each member of the EXCO were extraordinary and well-deserved credit. Then, we have seen closer collaboration with stakeholders in addressing the industry issues and challenges even from the working group level, which immediate action can be taken and discussed further.

On another topic, mapping the path to a lower-carbon world will be a defining challenge in the decades ahead. This alarm about climate is a great motivator for the 'Energy Transition.' Energy transitions are not new. They have been going on for a long time and unfold over time. The oil and gas industry needs to transition itself to contribute towards the attainment of the global climate targets. I hope for the industry, especially the OGSE sector and members, to be active, support continuously, and be engaged with MOGSC and the Working Group to address issues related to ensuring we will be ready for this energy transition, besides aligning with our Key stakeholder, PETRONAS’ aspiration to achieve net zero carbon emissions by 2050 through an energy transition pathway.

As we shared earlier this term, MOGSC will focus on the 4 key focus areas and the Strategic Thrusts. Let’s continue to realize this, and let’s work together and make our industry blossom again.

Here's to a bright New Year and a fond farewell to the old, here's to the things that are yet to come and to the memories that we hold, wishing you a happy, healthy & prosperous New Year! " - Farra Ahmad, Assistant Honorary Secretary

"MOGSC in 2022 represents a changing of the guard. The predecessors have done a brilliant job steering the OGSEs during the turbulent 2015 to 2021. The association was instrumental in shoring up the O&G industry supporting the ecosystem by offering reduced rates, flexible arrangements, taking more contractual risks and others. Moving ahead to 2023, we would like to see a more balanced industry. The OGSEs have “earned their stripes” during the difficult period, thus should be “rewarded” with sustainable contracts to strengthen the local ecosystem to the point of export-ready. On the sustainability front, MOGSC aims to continue its role in advocating the changing business landscape to ensure OGSEs are ready to play globally. " - Ts. Amir Hisham Albakri, EXCO

HAPPY NEW YEAR & WISH ALL MEMBERS A GREAT 2023
On 4th October 2022, MOGSC was proud to continue supporting MPRC in the National OGSE Roadshow with its grand finale in Kuala Lumpur, after successful events in Terengganu, Sabah and Sarawak. We are aligned in our objectives of creating a resilient and competitive OGSE sector for the long run. Hence, the OGSE Blueprint 2021-2030 is a good document to realise this objective.

It was a good address by YB Minister in his keynote, emphasizing the importance of OGSE players, regardless the push of new energy mix. We managed to further exchange our views during his visit to our booth.
The discussions revolved around COVID-19 claims, proposal for equitable contracting mechanism to ensure sustainable supply chain, continuous efforts on addressing liquidity issues via financing, proposal for collaboration on technology funds and ease of commercialization, sustainability and ESG agenda, and the impact of Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) to the ecosystem.

MOGSC also proposed to have a 1 day workshop, a collaboration between PETRONAS and industry players, so that we can create a platform for mutual discussions to gather pain points of the industry and the recommendations moving forward.

We thank PETRONAS for their openness in wanting to collaborate with MOGSC to address industry issues and looking forward to engage more.
### MOGSC’S RECOMMENDATIONS TO PETRONAS

<table>
<thead>
<tr>
<th>Topics</th>
<th>Discussion Points and Recommendations</th>
</tr>
</thead>
</table>
| 1) COVID-19 Claims            | a) MOGSC presented issues and statistics from the recent survey that relates to COVID-19 claims which touches on the cascading of reimbursed COVID-19 claims from PETRONAS down to sub-contractor level.  
 b) MOGSC also sought more clarity from PETRONAS on the reimbursement of COVID-19 claims in terms of categorisation of direct and indirect costs and how best this information can be disseminated to the industry. |
| 2) Equitable Contracting      | a) MOGSC proposed the combination of 2 workstreams, Bundle/Unbundling and Fair Price Benchmarking, into this group as both are interrelated.  
 b) MOGSC proposed few immediate improvements as deliberated with members which includes:  
 i. Unbundling of Installation and HUC works from EPCIC contracts  
 ii. Reimbursement type of contract terms related to materials and third-party services which cannot be ascertained for long term contracts  
 iii. Renegotiations and discussion on rate revisions for current contract impacted by price escalation  
 iv. Efficient bidding process that put less emphasis on lowest price but more on effective cost  
 c) MOGSC also proposed to have a 1-day workshop in collaboration with PETRONAS and industry players to create a platform for mutual discussion to gather pain points of the industry and the recommendations moving forward, on a bigger scale. |
| Mechanism                    |                                                                                                                                                                                                                                                                                                                                                                               |
| 3) Addressing Financial       | a) MOGSC proposed to expand financing mechanism to beyond financial institutions. MOGSC plans to gather a few of these parties which includes factoring houses to see how we can bring their services up to a level accepted by PETRONAS  
 b) PETRONAS will continue to collaborate with banks to ensure sufficient liquidity in the market.                                                                                                                                                                                                                      |
| Issues                       |                                                                                                                                                                                                                                                                                                                                                                               |
| 4) Technology Funds           | a) MOGSC highlighted the need of a collaboration between PETRONAS and the industry to ensure our local companies can be well supported in the space of R&D.  
 b) MOGSC will bring this agenda to PETRONAS Research (PRSB)                                                                                                                                                                                                                                                                                                      |
| 5) Sustainability Agenda      | a) Both MOGSC and PETRONAS agreed that more efforts must be done together to ensure the whole ecosystem embrace this collectively.                                                                                                                                                                                                                                           |
| and ESG                      |                                                                                                                                                                                                                                                                                                                                                                               |
| 6) Impact of CPTPP            | a) There is a need to further understand the impact of the ratification of this document to the industry  
 b) MOGSC will try to arrange an awareness session with its members                                                                                                                                                                                                                                                                                      |
On 1st November 2022, we started our engagements in Sabah with Datuk Harun Ismail, the MD/CEO of Sabah Oil & Gas Development Corporation (SOGDC) at his office. SOGDC is a MOGSC member since 2018.

We took the opportunity to share with him about MOGSC and our priorities and focus areas and we mentioned that we look forward to be more active in Sabah by gathering Sabahan’s to be part of a common platform for the betterment of the industry collectively. We are also looking to play the role of connecting Sabahan companies with Peninsular’s players in order to strengthen Sabahans position in securing projects.

Datuk Harun also shared 2 of his personal beliefs and fundamentals in managing a company. The first one is to ensure all his staffs have the basic knowledge of internal auditing so that they will have better grasp of procedures and processes. The second one is to ensure all within the company can market the company well by ensuring every layer understands the business and its core competencies as all staff are ambassadors to the company.

MOGSC’s second engagement in Sabah was with the CEO of Sabah Energy Corporation Sdn Bhd, En Adzmir Abd Rahman.

We had exchanged views on the energy industry in Malaysia and specifically the potential in Sabah. We will liaise with them on Sabah Gas Masterplan to understand more of the agenda that eventually will open up opportunities for the industry players. MOGSC is looking to be collaborating and playing advocacy with SEC to bring benefits to both local Sabah contractors and OGSE players.
Our next engagement was with YB Datuk Seri Panglima Haji Masidi Manjun, Minister of Local Government and Housing / Minister of Finance II Sabah. He is also the Chairman of SMJ Sdn Bhd, a state owned company looking after the interest of Sabah Oil & Gas.

In the meeting, we were looking forward to collaborate with Sabah State into positioning MOGSC as a strategic partner in their OGSE development and growth. As mentioned in the meeting, MOGSC will collaborate towards achieving the state aspirations in increasing local Sabahan contractors participation in oil and gas contracts and also the increment of local Sabahan contents in companies operating in oil and gas industry.

The meeting was also attended by SMJ’s advisor, Dato' Seri Lim Haw Kuang and their Director, Datuk Brenndon Soh and also representatives from Sabah Economic Planning Unit.

**Kupi-Kupi with Sabah OGSE Players**

We held a "Kupi-Kupi" session at Sutera Harbour, Kota Kinabalu with members and stakeholders. We had approximately 50 attendees at this relaxing engagement session attended by PETRONAS, Service Providers, Port operators, State GLCs and many more.

It was good session where we exchanged views and opinions and also explored how MOGSC can be more efficient and effective in managing stakeholders.
On 2nd November 2022, MOGSC engaged with Mr. Prithipal Singh, the General Manager for Sabah Deepwater and the Director of Sabah Shell Petroleum Company at Plaza Shell Sabah.

We used the session to brief him on MOGSC’s main priorities and also our 4 key focus areas. It is pleasing to hear that Shell and MOGSC are aligned in these fundamentals which includes ensuring equitable contracting mechanism and also the sustainability agenda.

We also had the chance to hear from Shell their pain points which relates to the OGSE sectors which includes the issues of non-payments within the supply chain and also lack of local specialised and niche services providers offering services to clients especially in the space of deepwater. We also touched on OSV and marine issues that needs to be addressed to prevent shortages in the market in the near future.

We paid a courtesy visit to the Permanent Secretary of the Sabah Science, Technology and Innovation Ministry, Datuk Zainuddin Aman.

We discussed on potential collaboration between MOGSC and the state on the following matters:

1) Collaboration between MOGSC and state agencies to assist local company’s penetration into both upstream and downstream business.

2) Training programs where MOGSC can collaborate with training centers to fulfill requirements of skilled and semi skilled opportunities of local Sabahan people to be involved in oil and gas projects.

3) CSR programs where MOGSC can syndicate with its members to assist state aspirations of creating Science Centers in few districts in Sabah and also play a role to increase interest in science and technology in schools in Sabah.
On 8th November 2022, MOGSC collaborated with PETRONAS to organize the Installation Technical Forum 2022. We had an overwhelming response to this program where approximately 200 participants from both PETRONAS and industry players joining.

With the theme of collaboration and innovation in shaping the future of the offshore installation industry, the forum aimed to be the avenue for offshore installation work practitioners to exhibit capabilities and technologies as well as share their perspectives and viewpoints relating to challenges and recommendations to move forward relating to this segment.

In MOGSC President’s opening remarks, he highlighted these 2 issues:

1) **Sustainability of doing business in this segment where many contractors ceased to exist and those who still remain decided to change their business model.**

2) **MOGSC’s recommendations to PETRONAS in our recent engagement is to unbundle both Installation and Commissioning from the traditional EPCI contract as the exposure of being a second tier contractor in these segments is too high.**

**TECHNOLOGY COLLABORATION & INNOVATION DIALOGUE**

On 14th November 2022, MOGSC collaborated with PETRONAS Research Sdn Bhd (PRSB) to organize a dialogue and forum session focusing on technology and innovation. It was attended by both PETRONAS team and approximately 50 OGSE service providers.

The main objective of the program is to give clarity on PETRONAS approaches in the technology and innovation space and how the industry players can be part of the journey.

Later in the day, MOGSC engaged with PETRONAS Chief Technology Officer and both management of PRSB and PTVSB on immediate potential collaboration.

For this, MOGSC will come out with a framework on a program specifically for its members to propose technology and innovative ideas to be adopted by PETRONAS in the space of future positioning and competitive edge. Other than this, MOGSC plans to collaborate with PRSB to tap on R&D done by universities that can be monetized and commercialized especially that relates to operation excellence.
On 14th November 2022, MOGSC delegation from EXCO and CCWG attended Skill Group 11 industry alignment workshop with GTS, PETRONAS. GTS organized the workshop to pave alignment between technical capability management with PETRONAS and that of expected from industry through OGSE technical professional services.

SKG 11- Civil and Pipeline Engineering envisaged many possible joint initiatives to improve the quality of deliverance and at the same PETRONAS to understand industry paint points in nurturing and developing industry talents for the SKG11. MOGSC also highlighted PETRONAS to align with Industrial Skills Framework (IndSF 2.0) that had been recently developed by MOGSC-PETRONAS collaboration.

The workshop concluded with several identified initiatives for works to be done in year 2023 and beyond to produce sustainable talent need and also OGSE sectorial development in the area.
On 17th November 2022, MOGSC continued to play an active role in advocating improvement in practices in the industry that can position the local players to compete globally with enhanced capability.

It is important to listen to the plight of the industry on challenges brought about by the new practices and to ensure smooth implementation. Thank you to PETRONAS to include the industry as joint industry committee in the project to ensure equitable benefits achieved by both PETRONAS and OGSE sector.

MOGSC President touched on the importance of focusing on Sustainable Development Goal No. 8 - Decent Work and Economic Growth and No. 10 - Reduce Inequalities, in order for us to close gaps and collectively achieve this sustainability agenda. These 2 agendas have targets that if implemented will ensure we will create a healthy ecosystem in the industry.

MOGSC President also touched on the importance of all the stakeholders to collaborate and work together to strengthen the OGSE ecosystem so it can remain resilient and competitive to undertake this sustainability journey.

“Heal the world, make it a better place, for you and for me and the entire human race”
MOGSC is proud to stand together with fellow captains of the OGSE sector for this initiative. As a major contributor to the national GDP (20% according to MIDA), the industry needs to keep abreast with the latest development, technology, competency and innovation in order to remain resilient, competitive and relevant.

As a growing nation of approximately 32mil in population, much emphasis must be given to the OGSE to spearhead the country’s economy so that we can compete in the global market. With the ratification of the CPTPP, competition will soar and by equipping our OGSE with the necessary tools are we able to benefit from this.

**MOGSC LED INITIATIVES IN THE NATIONAL OGSE BLUEPRINT**

**E2: Financial Management Workshop**

The National OGSE Steering Committee Meeting No. 1/2022 has endorsed for tracking and monitoring of MOGSC’s KPIs be put on hold until their request for budget and resources are resolved. Two discussions were conducted with MPRC and EPU on 10 June 2022 and with MPRC, PETRONAS and MOGSC on 14 July 2022, as instructed by National OGSE Steering Committee Chairman to further deliberate to resolve MOGSC’s resources issue. The discussions agreed to pursue a cost-effective collaboration by assisting MOGSC to implement their initiative with current resources available. PETRONAS, in collaboration with MOGSC and MOSVA hosted the PETRONAS Vendor Financing Programme (VFP) Conversation Day on 16 August 2022 with 9 strategic partners - Bank Islam, Bank Muamalat, Bank Rakyat, CIMB, EXIM Bank, HSBC, Maybank, RHB, and UOB. Approximately 200 participants attended the Vendor Financing Programme Conversation Day. MPRC in collaboration with MOGSC conducted the MPRC Industry Engagement Series: Funding Opportunities and Financial Management for OGSE on 25 August 2022, supported by partner agencies AKPK, SJPP, MIDF, TERAJU, EXIM Bank and SME Bank which were attended by 200 pax representing more than 90 companies.
B2: R&D Apprenticeship Program

Initiative has not started due to resources constraint and MOGSC has submitted budget request paper for consideration in National OGSE Steering Committee Meeting No. 1/2022 Meeting and initiative implementation progress reporting is suspended until the resource requirements are resolved. Steering Committee has instructed MOGSC to discuss with EPU and PETRONAS regarding the resources required and collaboration with PETRONAS. Discussions conducted with MOGSC and PETRONAS on 5 July 2022 and on 14 July 2022 proposed a OGSE Blueprint Technology Lever Working Group to formalize the collaboration. MOGSC members / OGSE companies' representatives participated in the B1: Applied R&D centers to bridge academia & industry workshop conducted on 27 October 2022. The findings from the workshop will guide the roll-out of the the R&D apprenticeship program.

NATIONAL OGSE BLUEPRINT SNAPSHOTs

1. A robust, resilient, and globally-competitive Malaysian OGSE sector which contributes to the sustainable development of national priorities

2. Key strategic thrusts prop the vision, supported by enablers

3. Proposed targets for Malaysia in 2030 along strategic thrusts aim to plug gaps to vision while being realistic in aspiration

4. 31 recommendations, spanning the enablers for Malaysian OGSE
One of MOGSC’s plan is to establish regional collaboration with our counterparts in neighboring countries so that we can exchange views and look into strategic collaboration.

We were delighted to be accorded such a warm welcome by Singapore industry associations - Association of Singapore Marine Industries (ASMI) and Association of Process Industry (ASPRI) during our visit to OSEA Exhibition in Singapore.

ASMI invited us to their 54th Anniversary dinner upon knowing we attended OSEA while ASPRI arranged an engagement and visit to their training and dormitory facilities on a very short notice.

We will continue to explore this collaboration and hopefully to organise the first ASEAN industry associations engagement this year.

Thank you ASMI and ASPRI and we hope to catch up with you again.
On 13th December 2022, at the International Project Management Conference (IPMC), MOGSC and PETRONAS, together with 11 service providers, signed a Commitment Pledge in a small ceremony organised at the exhibition hall.

MOGSC and PETRONAS had been working closely on the Joint Industry Collaboration (JIC) initiative, focusing on the enhancement of piping capabilities.

Back in October 2021, a Situational Assessment was conducted to identify the probable causes of underperformance by the piping subcontractor for onshore fabrication activities. Among the major pain points faced by various stakeholders are manpower availability, capabilities and competency issues.

Hence, JIC was formed, consisting of MOGSC, 11 industry players, INSTEP & Human Capital Investment (HCI) PETRONAS on 1st June 2022 with focus areas to address the issues.

As of November 2022, the team had achieved various positive deliverables:

1) Conducted Career roadshow to students at IKM Jasin, Melaka in November 2022
2) Acquired scrapped material & consumables from MRCSB at zero cost as part of CSR program. The material is expected to be delivered to IKM Jasin.
3) Completed & established syllabus review workshop for welders & fitter with a collaboration with INSTEP and 10 industry and institution partners. The new syllabus is expected to be rolled out in Q3 2023.

Moving forward, on behalf of the industry, MOGSC pledge to actively participate and support the success of this program in a spirit of “one team, one goal”.
On 13th November 2022, Tn. Syed Saggaf Syed Ahmad represented MOGSC as one of the panelists in the Asset Decommissioning Enhancement Workshop. Other panelists include Ts. Ariff Zainai from MPM, PETRONAS and representatives from PETRONAS Carigali, ExxonMobil and Hibiscus Petroleum.

The session involved mostly the operators and with MOGSC working group committee members representing the industry. It was pleasing that we had a good and transparent session with both sides sharing pain points and recommendations to resolve issues.

When asked about MOGSC’s aspiration for the industry players in the decommissioning space, MOGSC’s response was that having an equitable and fair contracting structure is paramount in ensuring effective and efficient delivery of projects. This will allow both industry players and operators to remain resilient and competitive and subsequently ensure the supply chain within the industry can be sustained and protected. This will also allow talent retention to be possible within this segment.

On top of that, for the industry to be ready with proper investments, operators must collectively come out with a realistic volume based projection of what is in the pipeline. Most of what was projected in the PETRONAS Activity Outlook did not achieve a desirable outcome of actual execution.

There is still excitement in this segment and MOGSC will continue to play its role in shaping this segment with the operators.
PETRONAS hosted a special briefing session for MOGSC members on their Race2Decarbonise initiative on 14 December 2022.

The commitment by PETRONAS and OGSE players in this agenda, reflect the aspirations of the nation and its people in conscientiously looking into preserving the current for the future as much as possible; of course at the same time make the current needs for community are met via affordable supply of energy.

We would like to thank our fellow members and PETRONAS who joined to pledge our commitment and launch the race among OGSE community by inviting ideas from bright minds from every fraternity towards the aspirations.

We hope OGSE players participate in this initiative and submit your ideas and be shortlisted to pitch in the final stage in March 2023 for an opportunity to realize the innovation on the ground.
On 5th November 2022, MOGSC held our futsal competition between members at Futsal hub Ampang. We had 32 Men and 4 Women teams participated with approximately 450 people attending this event either as players or supporters. It was also pleasing to see some top level management from respective teams attend to give support to their staffs.

Futsal is important to MOGSC because it delivers the message of inclusiveness among all layers of the over 550 member companies and workforce that it represents. Generally it was played in a high sporting spirit and it was good to see our members had a chance to network and get together in a sporting environment.

Congratulations to team Hemat Marine for becoming the champion of the Men Futsal Tournament (Cup Category) and champion MISC A (Plate Category). Congratulations also to the Women’s Futsal Team also from Hemat Marine for becoming the champion of the Women’s Tournament.
On 23rd November 2022, we organized the MOGSC-MGA Annual Industry Gala Dinner with the theme Roaring 20’s at InterContinental Kuala Lumpur. It was great to see the hall was packed and we had enough seats to form a great party.

To put things into perspective, the Roaring 20’s, is a tribute to a period of time that happened a century ago. This decade was preceded by a tough 10 years before, where the world had just went through World War 1 from 1914 to 1918. The war not only had resulted in death of millions of people but the aftermath of the war caused a brief but deep recession. The world had also went through the Spanish Flu Pandemic which started in 1918, where it was reported that 500 million population worldwide had been infected, roughly a third of the population back then.

So the 20’s were a decade where the world bounced back from their despair and the spirit of the Roaring 20’s was marked by a general feeling of novelty associated with modernity and a break with tradition, through modern technologies such as automobiles, moving pictures, and radio. It was a period of economic prosperity with a distinctive cultural edge driven by recovery from wartime devastation and deferred spending, a boom in construction, and the rapid growth of consumer goods such as automobiles and electricity in North America and Europe and a few other developed countries.

Fast forward a 100 years later, coincidently, the world had seen the events of the past unfolding in front of our eyes. The COVID-19 Pandemic, rising inflation, supply chain disruptions, labour market challenges and made worst by the Ukraine-Russia War.

But, we need to be optimistic, despite all these challenges, to ensure that we create our new Roaring 20’s, driven by the sustainable development goals so that we can all prosper together.
In this quarter, MOGSC had played 3 games against SUBSEA7, MISC and GYRODATA at the old ISKL Ampang Campus, Padang Kelab Aman in Kuala Lumpur and Stadium MP AJ in Pandan Perdana.

**MOGSC 3 - 1 SUBSEA7**

**MOGSC 2 - 2 MISC**

It is our great pleasure to invite you and your colleagues to the 10th Sabah Oil, Gas & Energy Conference & Exhibition (SOGCE) 2023, with the theme, “Energy Security and Sustainability in Oil, Gas & Energy Industry in Sabah”.

The 10th SOGCE is organised by Midas Events Management (MEM) (wholly-owned by Falconet Resources Sdn Bhd), an Award Winner of APAC Insider South-East Asia Business Awards 2021, as the “Best Corporate Events Management Company - East Malaysia”, and also an Award Winner of the Corporate LiveWire Global Awards 2021/2022 in the category of “Corporate Events Management Specialists of the year”.

The 10th SOGCE comprises of 2-Day Conference which will be held on 8 & 9 June 2023, at the Sipadan Hall 1, Level 4, Sabah International Convention Centre (SICC), Kota Kinabalu, Sabah, Malaysia and also 2-Day Exhibition that will run concurrently with the conference, at the Kinabatangan Hall 1, Level 2, SICC, Kota Kinabalu, Sabah, Malaysia.

The discovery of deep oilfields off the coast of Sabah, the setting up of the Sabah Oil and Gas Terminal in Kimanis and the Sipitang Oil and Gas Industrial Park (SOGIP) are testament of an increase set up of oil, gas & energy companies in Sabah which offers job opportunities for the local Sabahan and also opens up more collaborations and business opportunities for Sabah local contractors in the fields of oil, gas & energy, which help spur the growth of this industry.

The Sabah state government emphasised therefore that SOGIP be developed into its full potential as a premier petrochemical gas and petroleum downstream activity hub in this region aside from creating high quality jobs for the people.

SOGCE, the only oil, gas & energy conference and exhibition continues to play a vital role in providing the right platform for all experts in the oil & gas industry, technologists, academicians, industry players, policy makers to meet and engage in complex and pivotal discussions aimed to propel and sustain the future of Sabah’s oil, gas & energy industry with emphasis on Energy Security and Sustainability in Oil, Gas & Energy Industry in Sabah.

SOGCE is also created to assist and complement the state government in promoting the Oil, Gas & Energy Industry in Sabah.

It also spurs collaborations, and partnerships for mutual benefits and aims to attract international and domestic oil and gas executives from various oil, gas & energy companies local and international.

The 10th SOGCE comprises conference, plenary sessions and a conversation with a Special Guest from the oil & gas company, and an exhibition that will showcase latest equipment, technology & solutions to demonstrate competitive advantages and competencies that include international and regional energy companies, service providers, and oil, gas & energy companies.

MEM will be hosting a Networking Golf which will be organised by the Malaysian Oil, Gas & Energy Services Council (MOGSC), to be held on 10 June 2023 at the Sutera Harbour Golf & Country Club, Kota Kinabalu, Sabah, Malaysia, in conjunction with the 10th SOGCE.
